**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 29-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lutz et al.

(U.S. Pat. 6,114,366) in view of Reeve (U.S. Pat. 5,210,094), DE 2337755 (Abstract), DE 19534532 (Abstract), Raad et al. (U.S. Pat. 6,267,979), Grier et al. (U.S. Pat. 4,119,779) and Rothenburger et al. (U.S. Pat. 6,121,302) for the reasons of record set forth in the prior Office Action relative to claim 1-28 and the further reasons below.

Lutz et al. (U.S. Pat. 6,114,366), Reeve (U.S. Pat. 5,210,094), DE 2337755 (Abstract), DE 19534532 (Abstract), Raad et al. (U.S. Pat. 6,267,979), Grier et al. (U.S. Pat. 4,119,779) and Rothenburger et al. (U.S. Pat. 6,121,302) were discussed in the prior Office Action and the same are incorporated herein.

Examiner has duly considered Applicant's arguments but deems them unpersuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on

Art Unit: 1616

combinations of references. See *In re Keller*, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 231 USPQ 375 (Fed. Cir. 1986). Further, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 208 USPQ 871 (CCPA 1981). Applicant argues that one of ordinary skill in the art would appreciate that the synergistic properties in DE 2337755 would be limited to the compounds disclosed in the document to achieve such an effect. Assuming said argument was valid, then Applicant's composition would likewise be limited to only those compounds disclosed as being synergistic. However, Applicant has provided no support for its conclusion that one of ordinary skill in the art would conclude that synergy requires the exclusion of all other compounds not disclosed. Applicant argues that there is no motivation to combine Raad et al., however, as indicated in the Office Action, chelators improve the antimicrobial activity of antimicrobials, including formaldehyde and isothiazolones. Also, the Office Action does not concede that the cited publications fail to disclose the combination of a bactericidal N-formal, fungicide and stabilizer, the Office Action specifically stated "expressly disclosed" and as indicated above, no single reference is required to disclose or even expressly suggest the claimed invention only that the combination of references suggest the same. The references herein, as set forth in the prior Office Action, suggest the desirability of combining the components of the claimed invention. Applicant argues that it has shown unexpected preservative properties, however, the prior art discloses that isothiazolones are effective biocides but degrade relatively easily and, therefore, required stabilizers and also disclose that the claimed

Art Unit: 1616

stabilizers act synergistically with the N-formals. As such, Applicant's evidence appears show expected results and therefore do not appear to sufficient to overcome the obviousness rejection herein.

Therefore, the claimed invention, as a whole, would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, because every element of the invention has been collectively taught by the combined teachings of the references.

### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
